NATIONAL LIBRARY OF MEDICINE

LOAN POLICY

(effective September 1957)

All items listed in the CURRENT LIST OF MEDICAL LITERATURE are available at the National Library of Medicine. Readers who cannot obtain the journals at local libraries and who cannot come to the National Library of Medicine in person may use the interlibrary loan services of the National Library of Medicine, which is designed to extend the services of the Library at a distance.

WHAT MAY BE BORROWED. All printed literature in the Library's collection is available for loan, with the exception of ordinary current, in-trade publications where the presumption of wide-spread accessibility elsewhere is reasonable.

WHO MAY BORROW. The National Library of Medicine will loan material only to other libraries; individuals must route their requests through these libraries.

FORM OF LOANS. Material in the Library will be loaned in the original form or as photoduplicates (microfilm or photoprints). The National Library of Medicine reserves the right to determine in which form the loan will be made.

INSTRUCTIONS

1. Requests for interlibrary loans are to be made in writing, using either the ALA Interlibrary Loan Form or the NLM Interlibrary Loan Form, available without charge from the Circulation Section, National Library of Medicine. All requests must be signed, and the signature shall be understood to be certification that the material requested is not available in the requesting library.

2. Requests for loans should contain full bibliographic information. A request for an article should show the name of the journal, date of issue, volume number, author, and title of the article, and the pages (inclusive numbering) on which the article appears.

3. Loans of original works are made on condition that the greatest care be taken in packing and transmitting material for return to the National Library of Medicine. Among other precautions, the corners and edges of books must be well protected; unbound material should not be rolled but should be sent flat, preferably by mail. All returns must be adequately insured.

4. All material in original form must be returned within two weeks of receipt. Any item may be recalled by the National Library of Medicine at any time. Interlibrary loans in the form of photocopies may be retained by the borrowing library.

OUTSTANDING COUPONS

The effective date of the change in Photoduplication practices described above is September 1, 1957. No coupons for photographic services will be sold after that date. Any photoduplication coupons sold by the National Library of Medicine or the Armed Forces Medical Library previously and still outstanding at that time will be honored. Those who desire to use their coupons for the purchase of photocopies may still do so. Refunds for unused coupons will also be made upon request.

The CURRENT LIST OF MEDICAL LITERATURE is for sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. Price: $ 13.50 per year; $ 17.00 foreign. All communications regarding subscriptions should be addressed to the Superintendent of Documents.

The printing of this publication has been approved by the Director of the Bureau of the Budget, 6 June 1956.

milk fat synthesis from acetate in mammary gland of cow 30120

musc., eff. of fasting in young rats of different ages 741

peritoneum, eff. of testosterone in castrated rat (Fr) 11253

role of lipotropic factors, animal exper., review (Sw) 20252

transport by heparinocytes in rats 17469

transport, role of cholesterol esters (Fr) 48188

triglycerides, conditions of resynthesis in rat intestinal mucosa, in vitro studies (Fr) 19078

unsaturated & saturated fats, in etiol. of hypercholesteremia & coronary dis. 13278

utilization of exogenous & turnover rate of endogenous fats, eff. of hypophysectomy in rats 9099

vitamin A absorp. test as fat metab. index 13212

preparation of

extraction from marine animals & refinements for use by man (Fr) 45997

oleomargarine (Fr) 45999

refining, eff. on nutritive value (Fr) 45918

FATTY ACIDS

***see also* LINOLEIC ACID**

***see also* OLEIC ACID**

***see also* STEARIC ACID**

***see also* UNDECYLENIC ACID**

cyclopentanone-2-carboxylic acid, condensation products from hydrazobenzene (It) 25943

△5, 8, 11, 14, 17-n-eicosapentanoic acid in cod liver oil (Ger) 26428

eicosapolyenoic acids, in bovine liver phospholipids 47382

F-active fatty acids (Ger) 33943

glucose alcuritate emulsion, parenteral nutrient 23866

n-heptadecanoic acid in unhydrogenated mutton fat 1701

in genital fat deposits in exper. obesity 26562

in glycerides & phospholipids in rabbit 24263

in Indian & Brit. fresh water & marine fishes 43999

in sera & cells used in tissue cultures 31832

in sorbitan fatty acid esters (Ger) 55168

in tobacco seed, relation to germinating capacity & eff. of storage cond. (Ger) 17433

iodine number determ. by modified Wijs method (Ger) 28791

iodine number determ., comparison of Kaufmann & Wijs methods (Ger) 28790

malvalic acid, chem. structure 28901

10-methyl-nonadecenoic acid, synthesis of optic antipodes & DL forms (It) 6379

△6, 9, 12, 15-octadecatetraenoic acid in herring oil (Ger) 46987

olfactory thresholds for fatty acids in dogs, relation to molecular size 28975

phthioic acid, in M. tuberc. (Ger) 7995

polyene fatty acids in guinea pig tissues 24359

polyunsaturated fatty acids, importance in nutrition 49063

polyunsaturated fatty acids, review 38998

short-chain fatty acids from C2 & C3, in various putrefied human tissues, comparison (It) 31281

deficiency

eff. of essential fatty acid defic. in young swine 39999

exper. essential fatty acid defic. in chicks, determ. of polyunsaturated fatty acids in blood, heart & liver 34160

determination

aromatic hydroxycarboxylic acids, paper chromatography (Ger) 39683

colorimetry (Ger) 17420

gas-chromatographic analysis 16705

higher saturated fatty acid mixtures, comparison of reversed-phase partition chromatography & ester fractionation 10613

measurement of long-chain fatty acids, method with methylene blue 40943

separation of C6-C12 acids by reversed-phase partition chromatography 1707

separation of short chain acids by chromatography (Fr) 43127

fluids
